# Migration from Microsoft Project Online to Microsoft Project for the Web

Microsoft  
Project Online

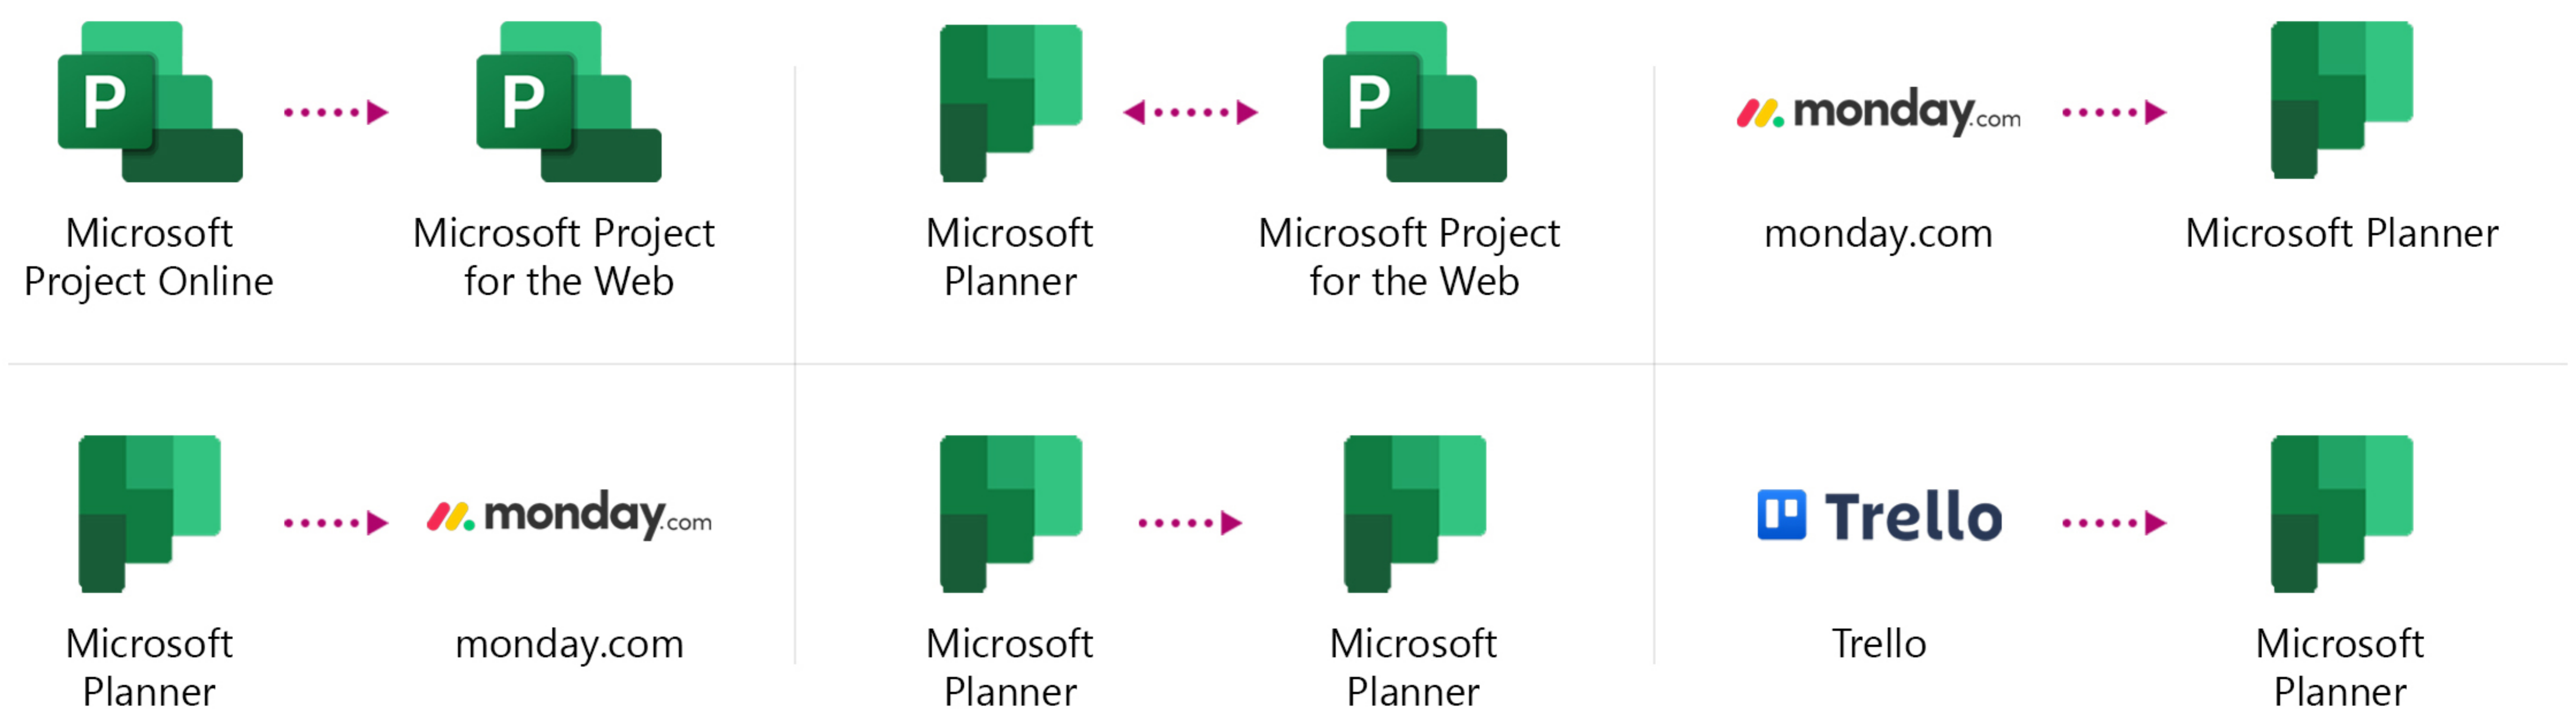

Microsoft Project  
Online for the Web

FluentPro has over 10 years of experience creating migration and integration software for project management. We created Project Migrator to help companies make project migration simple – by automating the project migration process and removing all the risks associated with the migration.

FluentPro Project Migrator is a cloud platform for automated project data migration that makes the data migration from one Project Management system to another fast and simple.

**The product supports multiple migration scenarios with modern project management platforms:**

**Benefits:**

- Save 90% of the time on project migrations
- Save up to 90% of the migration cost
- Reduce all risks related to migration - missing data, projects, tasks, notes, or documents
- No manual work - migration is 100% automated
- Run migration when you need it, from Microsoft Teams
- Your data is secure – runs on Microsoft Azure, never downloaded to any desktop computers

## Advantages of FluentPro Project Migrator

While Microsoft provides MPP import, there is a large number of associated limitations and data quality issues with MPP import that are solved by FluentPro Project Migrator.

Capability	Microsoft Project for the Web Import Feature	FluentPro Project Migrator
Automatic Migration	✗	✓
Migrating Multiple Projects	✗	✓
Migrating Directly from Microsoft Project Online	✗	✓
Project Update / Re-migration	✗	✓
O365 Groups Provisioning Mode	✗	✓
Automatic Resource & User Mapping to existing Resources	✗	✓
Creating Local Resources	✗	✓
Accurate Handling for Manual Tasks	✗	✓
Support of the Task Custom Fields in Project For the Web	✗	✗
Automatic Project Calendar Mapping	✗	✓
Handling of Project for the Web Platform Limitations	✗	✓

Offered at very affordable price level, Project Migrator is superior to the manual Microsoft Project for the Web MPP file import.
