

Migration from Microsoft 365 Planner to Monday.com

Why Project Managers find Project Migration so Frustrating

These days companies cannot use one project management system forever. Businesses are growing, they establish new goals, they handle more projects, and face the challenge of managing them.

As a result, project managers and IT specialists need to migrate all project data between systems. To avoid any damages, they tend to choose external migration tools. One of these migration tools is **FluentPro Project Migrator**.

How Project Migrator Simplifies Migration from Microsoft Planner to Monday.com

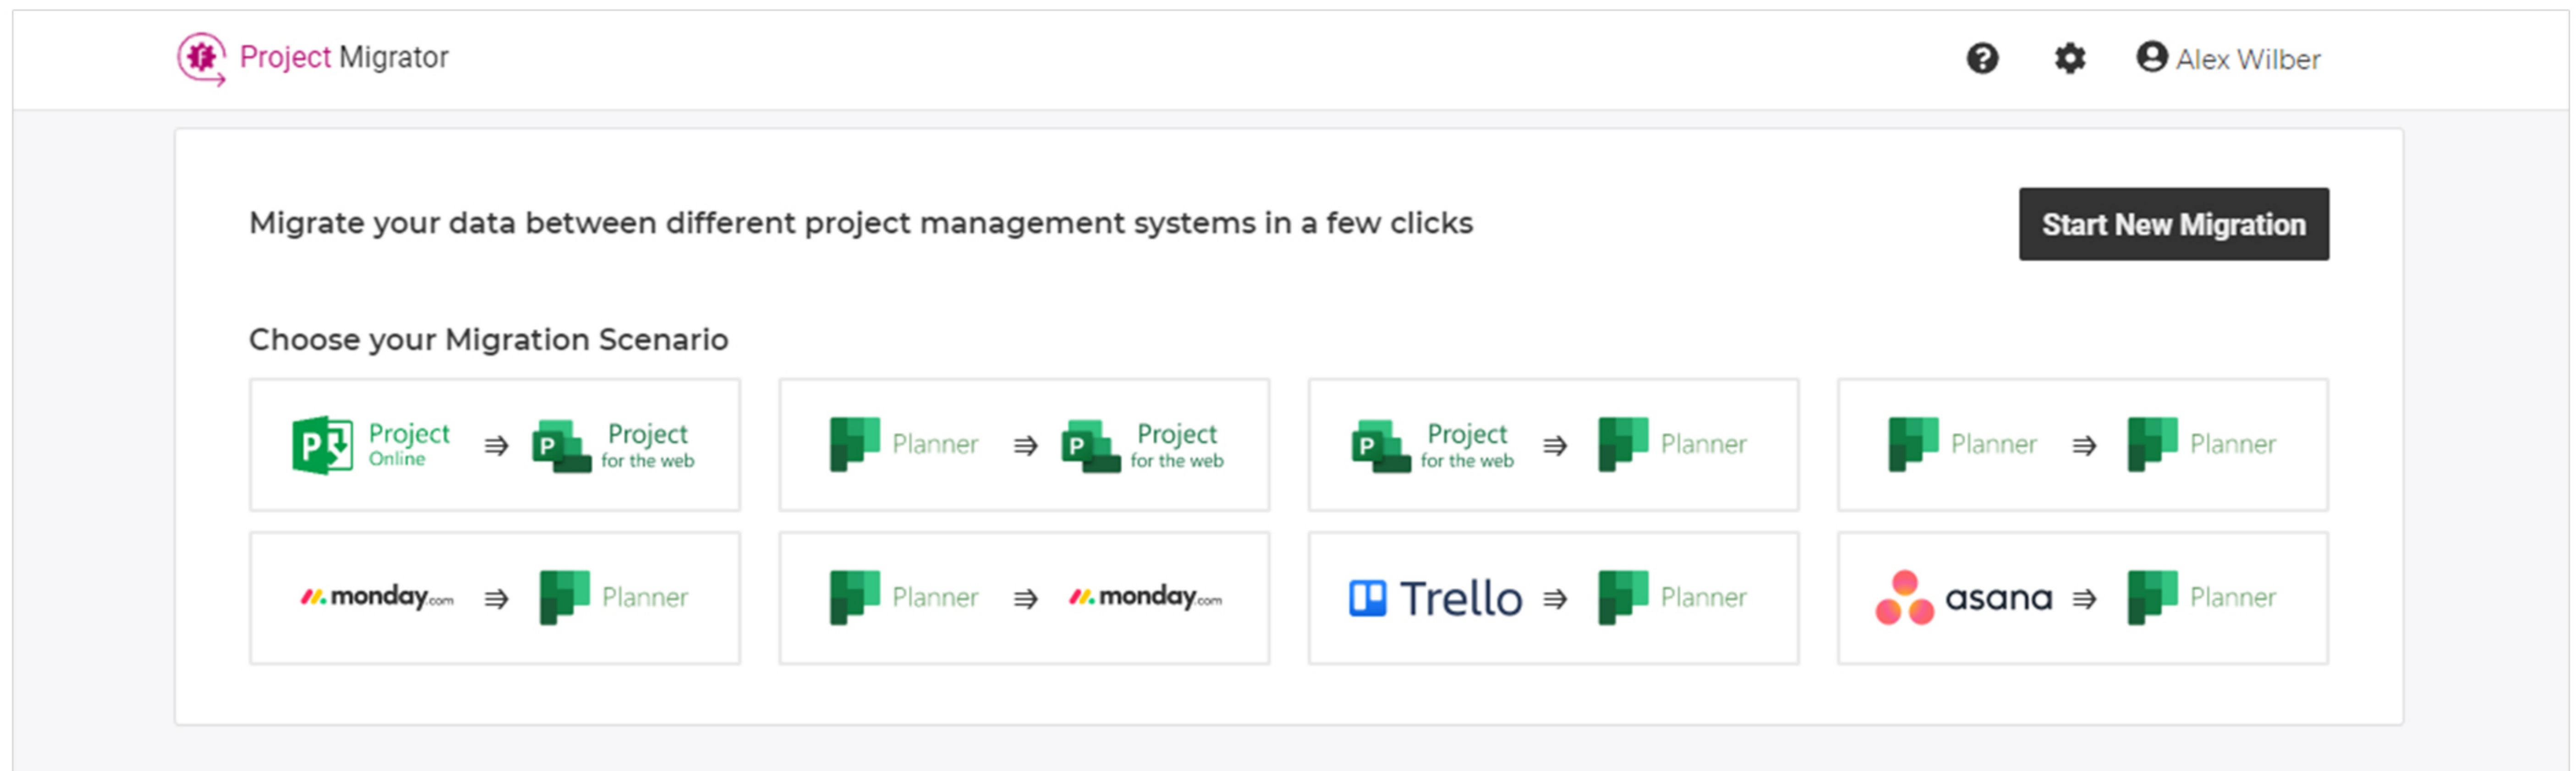

Migration is a time-consuming process that influences business significantly.

- It may cause data loss and document damages.
- Taking much time and effort, migration can stall projects.
- The process requires proprietary API usage, which is complicated to handle.
- It can also cause many financial expenses on technical experts who can migrate between project management systems.

FluentPro Project Migrator automates project migration from Microsoft Planner to Monday.com. Your migration runs on Microsoft Azure – all your data is safe in the cloud. Project managers and IT specialists also can run the migration whenever they need it from the web or [Microsoft Teams](#).
