

# Monday.com Migration to Microsoft Planner Office 365

For decades now, project managers and IT specialists have been using project management software to help them plan and organize work with teams.

As organizations are scaling up, an old project management system does not have enough capabilities for their needs. They're also going through mergers or acquisitions and need to bring two project management systems together into one. Working in Monday.com and Microsoft Planner, some organizations also want to take advantage of the advanced features and bring all workflow activities under Office 365. As a result, organizations need to migrate between project management systems.

When faced with the Monday.com migration to Microsoft Planner, project managers and IT run into multiple challenges.

## Challenges Associated with Monday.com to Microsoft Planner Migration

Deciding to migrate from Monday.com to Microsoft Planner manually, organizations run into one or more of the following challenges:

- **Time-Consuming Process** – Manually moving every task can take hours or even longer for large systems.
- **Data Loss** – Migrating manually can lead to losing critical project data due to human error factor or other related errors.
- **Missing Tasks** – If you forget to move a task from Monday.com to Microsoft Planner manually, you may not notice it until it is too late.
- **Creating Custom Scripts** – Developing and testing customized scripts that use APIs is a long and complicated process.
- **Additional Costs** – Project managers do not often have the technical background needed to complete this type of migration on their own. It causes the need to hire a specific technician.

These are just a few of the most common challenges organizations are facing. To solve them, they need an automated tool like **Project Migrator by FluentPro Software**.

## Streamline Migration Process with Project Migrator

When using **Project Migrator**, you can complete migration successfully. You can migrate your entire Monday.com over to the Microsoft Planner or choose specific projects to migrate.

To help complete your migration, Project Migrator offers a step-by-step plan. This four-step process goes as follows:

- Start by connecting your source and target system to Project Migrator.
- From there, select the source data that you want to be moved.
- Next, go through the advanced object mapping process where you choose what data goes where.
- Finally, launch the migration process.

Project Migrator can be used right from Microsoft Teams so project managers and IT specialists can perform migration whenever it is needed.

The screenshot shows the Project Migrator interface. At the top, it says "Project Migrator" and "Adele Vance". Below that, it says "Migrate your data between different project management systems in a few clicks" with a "Start New Migration" button. Under "Choose your Migration Scenario", there are several options: Project Online to Project for the web, Planner to Project for the web, Project for the web to Planner, Planner to Planner, Monday.com to Planner, Planner to Monday.com, and Trello to Planner. Below this is a "Migration History" table with columns for Migration, Status message, Start, Finish, and Status.

Migration	Status message	Start	Finish	Status
Monday.com ⇒ Planner	Completed Groups: 5/5, Projects: 15/15	09/23/2021 04:26 PM	09/23/2021 04:37 PM	Completed
Monday.com ⇒ Planner	Completed Groups: 6/6, Projects: 6/6	07/28/2021 04:04 PM	07/28/2021 04:07 PM	Completed
Monday.com ⇒ Planner	Completed Groups: 1/1, Projects: 205/205	07/28/2021 03:59 PM	07/28/2021 03:59 PM	Completed
Monday.com ⇒ Planner	Completed Groups: 1/1, Projects: 32/32	07/14/2021 01:12 PM	07/14/2021 01:54 PM	Completed
Monday.com ⇒ Planner	Completed Groups: 28/28, Projects: 28/28	06/22/2021 10:41 AM	06/22/2021 10:58 AM	Completed
Monday.com ⇒ Planner	Completed Groups: 12/12, Projects: 134/134	06/09/2021 02:21 PM	06/09/2021 04:06 PM	Completed

## Harness the Benefits for Your Business

Project Migrator brings numerous benefits to organizations:

- ✓ **Faster Migration** – save over 90% time spent on moving to a new project management system vs manual migration.
- ✓ **Reduced Risk** – Reduce the risk of losing critical project data due to document corruption or human errors.
- ✓ **Complete Security** – Keep important project data safe and secure throughout the migration process. It is possible by the fact that Project Migrator runs on the Microsoft Azure cloud platform.
- ✓ **Flexibility** – Once you have Project Migrator in place, you can move your projects anytime, via web app or right from Microsoft Teams.
