How to Automate Monday.com Migration to New Microsoft Planner
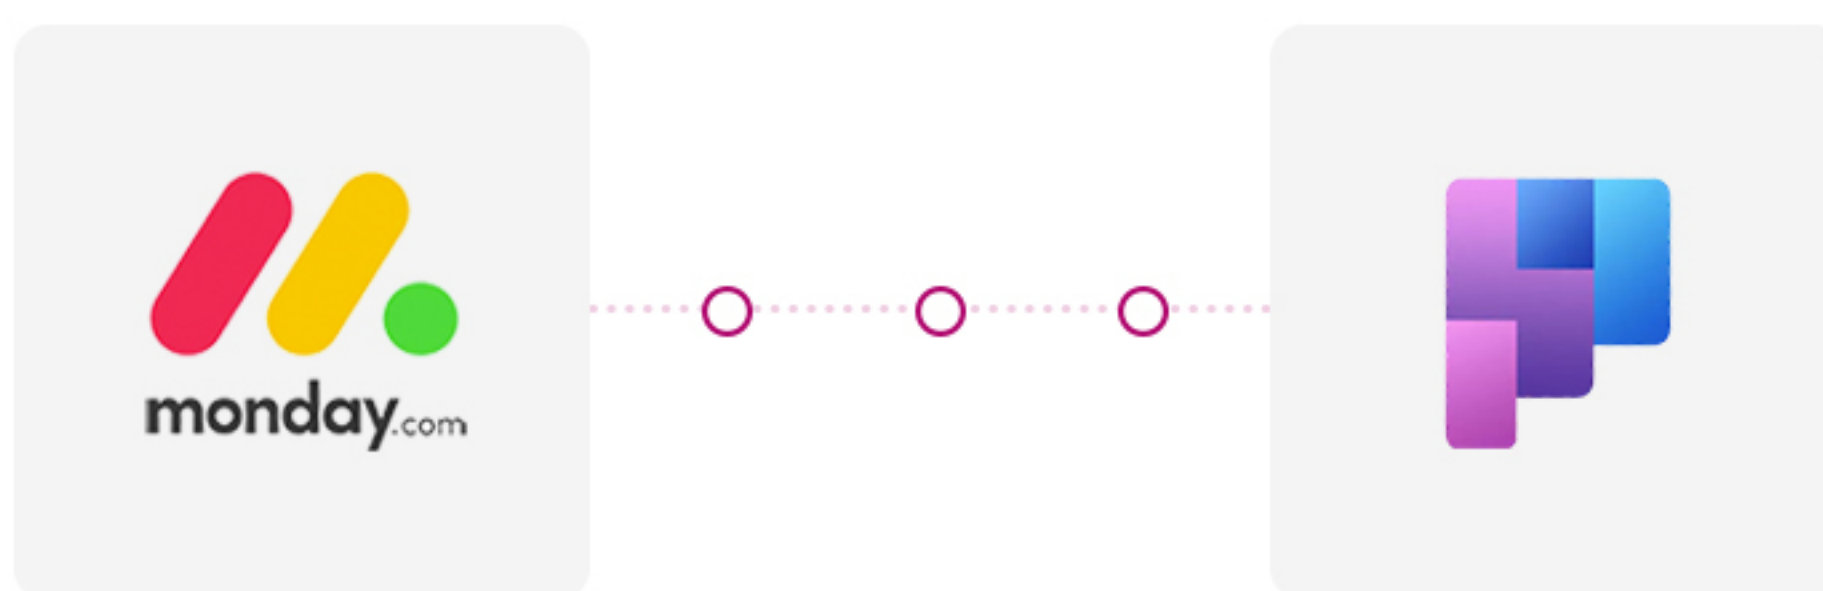

project migrator | monday.com

Monday.com helps organizations monitor, control projects, and establish efficient collaboration. As organizations grow, project managers need more advanced features of the project management platforms. Some notable platform limitations could be a reason for migrating all projects to more progressive systems.

New Planner is Microsoft's latest project management solution alternative to Monday.com. It provides advanced features and seamless integration with Office 365.

Project managers with an IT department planning to migrate from Monday.com face many challenges.

- Data redundancy

- Data loss risks

- Manual export and import

- Long debugging and data correction

- Long migration duration

Project managers should not waste time on tedious manual migrations and operational difficulties. To maximize productivity, you should have a fully functional system with all the necessary features in a short time. One of the best cloud migration solutions is FluentPro Project Migrator.

Automating Monday.com migration to New Planner

Project Migrator is a cloud migration solution that allows straightforward and effective migration of projects from Monday.com to New Planner.

Project Migrator enables simple, quick, and automated migration in four easy steps.

STEP 1   Build a link between the source environment (Monday.com) and the target one (New Planner).

STEP 2   Select the source data. Project Migrator allows you to select all data at once or only the required data.

STEP 3   Object mapping. You can easily choose which Monday.com data goes to which New Planner fields.

STEP 4   Start the migration procedure. You can view the migration summary after the migration is complete.

Temporarily migration can be completed in the Monday.com to Project for the Web migration scenario

Project Migrator easily handles major cloud project migration issues by enabling automated migration that is quick, error-free, and without data loss risks.

It also assists in designing more straightforward data mapping, allowing you to maximize the benefits of Microsoft Planner Premium.

Delivering value for organizations

With over 10 years of experience in simplifying PPM solutions, FluentPro delivers advanced solution automating migration. Project Migrator helps project managers save time and money by automating project data migration from various cloud platforms, including Monday.com migration to Microsoft New Planner.

Project Migrator helps address the critical issues associated with data mapping and helps with:

✔ **Reduction of risks** associated with human error or data loss.

✔ **Full automation** of the process by eliminating the need for any manual work.

✔ **Complete or partial migration** of project data, including content, configuration, projects, and resources.

✔ **Shorten the time** required for Monday.com migration to New Planner.
